## Apple Mac Notifications from the BMFC website

**Update Nov 23** - I lost my notifications, presumably due to an update, but who really knows. After verifying my settings as per the guidance below...nowt. Then I restarted the desktop. It worked, heaven help us.

Somehow I seem to have fixed the problem of missing news notifications for Apple Mac users, browsing with Safari. iPads and iPhones still do not enable notifications in settings.

These settings worked on 14 July 2023.

In System Settings, chose Notifications, then add our website. Set it to look like the image below.

If you already had it set up, toggle it on and off and toggle between Banners and Alerts.

•••	< Bury Model Flying Club

In Safari/Settings/Websites, with notifications already on (above actions), make sure that the Notifications option looks like this:

					We	bsites					
	දිටු General	C Tabs	AutoFill	Passwords	Q Search	Security	(D) Privacy	(Websites	<b>ک</b> ے Extensions	හිැි Advanced	
Genera	Auto-Play			These we Notificati	ebsites ha	ave asked e:	for perm	ission to sl	now alerts ir	n	
0	Page Zoom			ິ≱ Bur ⊕ cha	y Model I	lying Clul	b n			Allow	0
	Camera			() www	w.everno	te.com				Allow	0
	Screen Shar	ring									
7	Location										
	Downloads			Remove	e						
	Pop-up Win	dows		Allow	websites	to ask for	r permiss	ion to send	d notificatio	ns	
V Share	e across devi	ices									1

Then go to Pop-up Windows and select 'Allow':

• • •					We	bsites					
	දිටු General	C Tabs	AutoFill	Passwords	Q Search	Security	D Privacy	(Websites	ညာ Extensions	දිදිදු Advanced	
General	Auto-Play			Allow pop	o-up wind	lows on th	ne websit	es below:
